FOGGER

B&G 2600 Flex-A-Lite Fogger

For cold fog applications. The nozzle, attached to the flex hose, allows the user to easily direct the fog in, under and at objects. The convenient flow adjustment knob located at the nozzle enables the operator to change the liquid flow rate being dispensed. The operator can adjust the liquid flow to dispense materials at average droplet sizes under 20 microns (water-based chemicals at room temperature) for insecticides. Increasing the flow rate will increase droplet size to approximately 80 microns (maximum output). This droplet size is useful for applying disinfectants, deodorants, and heating duct applications.

Rubbermaid Microfiber Finish System

Designed for specialized floor cleaning and finish applications. Microfiber pads are traditional blue and white color, optimum shape for smooth, even application of floor finish. Durable construction, dense 3-5 micron-meter quality fiber removes more dust, dirt and microbes than conventional cleaning products. Foam liner controls liquid content and release. Advanced hook-and-loop backing attaches pad more securely, holds-up under harsh laundering conditions (more than 300 launderings). Quick-Connect Frame constructed of lightweight aluminum, flat profile is sanitary and easy to clean. Finish bucket is color-coded blue to differentiate use. "Washboard surface" removes dirt and debris from mop pads before wringing. Twist valve empties contents without lifting. Smooth, non-porous surface helps prevent bacterial growth and cleans easily. Starter kit includes: six Microfiber Finish Pads (RM-Q800); one Quick-Connect Wet/Dry Frame (RM-Q560); and one Finish Bucket (RM-Q930).

MOP CONSTRUCTION

Cut ends	Open-ended mops with a low initial cost, but a tendency to unravel, knot, and lint. They are best in low-use environments.
Looped ends	Mops with a closed-end that provide a more uniform cleaning path and have a longer life. They will not unravel when washed.
Tailband	A stitching toward the end of the mop that spreads the yarn evenly, increasing the cleaning path and maximizing a mop's efficiency.

PAD HOLDERS AND BRUSHES

Malish Pad-Lok Pad Holders

This pad holder is constructed using the "Tuff-Block" and an exclusive plastic riser. It is filled with heavy poly-propylene strands that are trimmed off-set to 1/2". These tufts penetrate into the pad and hold it tightly. We recommend ordering a pad holder one inch smaller than the diameter of the machine.
