

# ***Aero Plus***

## ***Three-Speed Dryer***

The three-speed Aero Plus Carpet Dryer from NSS® accelerates carpet drying time by as much as 50 percent. While carpet extractors remove most of the moisture they put down during cleaning, carpets may still be too damp for immediate traffic. That's where the Aero Plus can help.

- Aero Plus, with its three speeds, moves large volumes of air across the floor, accelerating drying and reducing the time any area is out of service.
- Adjustable to three positions, the Aero Plus allows you to direct the airflow exactly where you want it. The dryer is so versatile it can be used to dry carpeting, bare floors, upholstered furniture, and even ceilings.
- Stackable, it can be used in tandem with other units to further decrease drying time.
- The Aero Plus' sturdy, rotocast polyethylene housing features a convenient, balanced handle that makes transport easy.
- Weighing just over 34 pounds, the Aero Plus can be easily positioned to maximize drying power.
- The built-in cord wrap accommodates the Aero Plus' power cord for safe transport and handy storage.

## Three Operating Positions:

Flat for carpets and bare floors...

...45° for upholstered furniture or when applying floor finish...

...or 90° for ceilings.

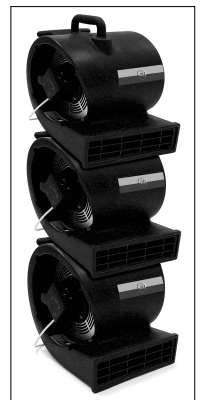

**1** The balanced handle makes it easy to carry.

**2** A safety grill protects the operator from coming in contact with moving parts.

**3** Durable rotocast polyethylene housing will not dent or crack.

**4** The built-in cord wrap allows convenient cord storage during transport.

Aero Plus dryers can be stacked for greater airflow and more efficient storage.
